GREAT PARTS FOR GREAT ENGINES!

MAHLE Aftermarket features the widest offering of quality products for the 7.3L Power Stroke® diesel engine in the world. Among the long list of parts are: MAHLE Original® pistons (with and without rings installed), quality MAHLE Original® ring sets (available in oversizes matching the pistons), the famous Clevite® TriMetal™ engine bearings (also available in four sizes), and MAHLE Original® gaskets.

The MAHLE Original® gasket offering serves as the industry's finest. The 7.3L Power Stroke head gasket is constructed of graphite material and is designed to seal minor surface irregularities. Superior to the OE gasket, graphite material conducts heat very well and can resist 1800°F in the clamped state. The perforated steel core and stainless steel flanges all help reduce cylinder head lift to maintain a superior combustion seal, and the MAHLE Original® head gasket does not require a re-torque once installed.

MAHLE Aftermarket does not stop the innovation with the head gasket. The MAHLE Original gasket offering includes the following sets and gaskets for the 7.3L Powerstroke:

- Head Set
- Cylinder Head Bolt Set
- Exhaust Manifold Gaskets
- Turbocharger Mounting Set
- Oil Cooler Mounting Set
- Fuel Injector O-Ring Sets

The MAHLE Original® gasket offering includes 36 gasket part numbers to service the Ford 7.3L Power Stroke engine which ensures the technician has every part needed.

Staying under the hood, but away from engine parts, MAHLE Aftermarket offers MAHLE Original® turbochargers and turbocharger service kits for the 7.3L engine; MAHLE Original® oil and air filters are also available for this application.

Make MAHLE Aftermarket your one-stop to get everything you need for the 7.3L Power Stroke diesel engine.
