

DEMAND

THE BEST

*Need a filter for a Mercedes-Benz?
The MAHLE Original[®] brand filter offers
better protection!*

Why choose the MAHLE Original[®] filter OX345/7D?

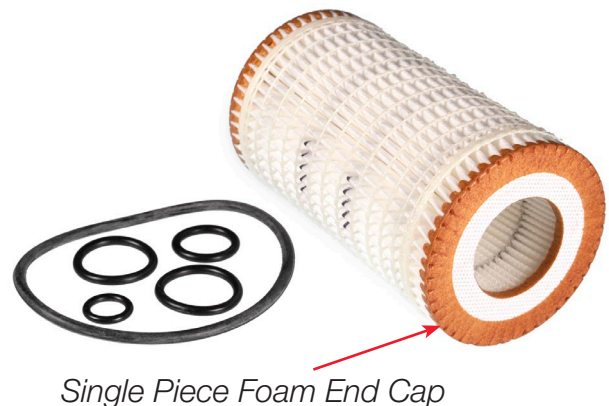

- It has a 3-piece plastic end cap where the competition uses foam.
- The top plastic piece on the MAHLE Original filter is ultrasonically welded to the endplate, which creates a housing for the flexible elastomer o-ring.
- The OX345/7D is easier to install and has a thicker and more efficient fleece media with the same filtration capacity as the competition.
