Oil Filter Adapter Gasket for the popular* Ford 4.6L / 5.4L Engines

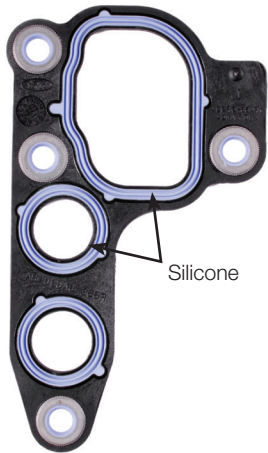

Replacing the oil filter on this popular engine?

When replacing this oil filter, the gasket is also commonly replaced to fix or prevent leaks. MAHLE Aftermarket offers the OE equivalent MAHLE® gasket which has a superior design and materials compared to the competitor.

*Covers 11,000,000 vehicles in operation.

ORIGINAL EQUIPMENT

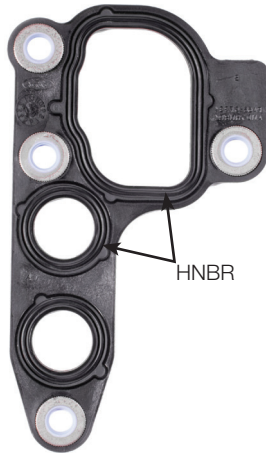

Old Design

Silicone

[Silicone rubber around fluid ports and bolt holes]

Updated Design

HNBR

[HNBR around fluid ports and silicone rubber around bolt holes]

This gasket seals oil and coolant; to best seal both fluids, the OEM improved the sealing materials replacing the silicone with HNBR.

AFTERMARKET

MAHLE

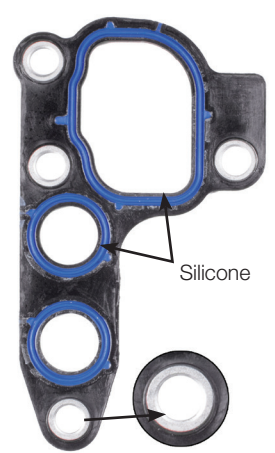

HNBR

[HNBR around fluid ports and silicone rubber around bolt holes]

Part # B31584**
uses HNBR rubber sealing material around fluid ports (equivalent to the updated OEM design).

Competitor

Silicone

[Silicone Rubber around fluid ports]

The competitor uses silicone and does not seal the bolt holes.

****Use with MAHLE oil filter part # OC 705 for best results.**
