

Your best  
choice!

## Original equipment competence in air conditioning compressors

Under the MAHLE umbrella brand and the BEHR sales brand, you can choose between approximately:

- **More than 500 PREMIUM LINE air conditioning compressors in OE quality**  
for customers who expect the best
- **More than 500 air conditioning compressors** in good **OE-matching quality**

We offer **extensive support** to help you replace air conditioning compressors and service A/C systems—**including our technical hotline.**

Air conditioning service units and other workshop equipment from MAHLE Service Solutions round out our **unique complete package.**

## PREMIUM LINE

### Spare parts in OE quality!

The around 4,700 PREMIUM LINE products in OE quality are especially durable. Thanks to their greater resilience, they still perform optimally even under extreme conditions, making them the ideal solution for customers who expect the best. However, the approximately 3,500 products in OE-matching quality without the PREMIUM LINE prefix also offer good performance at an attractive price. Under normal conditions, there isn't any difference in functionality.

## TechTool

TechTool  
by MAHLE

First-hand thermal management background knowledge—welcome to the new TechTool by MAHLE. Detailed insights into technical processes, active troubleshooting, and basic information are available online at any time, showing how automotive air conditioning and engine cooling work in passenger cars and commercial vehicles.

## Online filling quantities tool

Which filling quantities apply to which vehicle? You'll find the precise answers to this question for most common vehicle types in our current filling quantity manual for refrigerant and air conditioning compressor oil.

## SIMPLE FIT

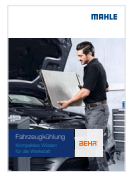

### Making fitting simple!

For products with the SIMPLE FIT label, certain installation accessories, such as O-rings or seals, are included and/or preassembled.

## Technical brochures on air conditioning and cooling

Take advantage of our comprehensive air conditioning and cooling know-how and receive education, training, and support for your workshop. Available to download now!

## Thermal Management Campaign

With our "Keep cool!" advertising materials and our popular penguin, Ole, we're by your side again to help you market air conditioning checks to your customers.

As you'd expect, we also offer practical technical support, such as information on filling quantities.

The support materials are available via your MAHLE sales partner or directly from the MAHLE advertising material shop:
