

As good as ever

New packaging,
same proven quality

Different packaging for PAG air conditioning compressor oils

Due to the standardization of our portfolio, PAG oils from MAHLE Aftermarket are now offered in larger containers with a new design and new reference numbers. The quality and composition of the oils remain unchanged.

What's changed?

- **Container size and shape**

The current, slimmer cans now contain 250 ml of oil instead of 240 ml, as previously. The quality and composition of the oil are unchanged.

- **Labels**

For uniformity reasons, the MAHLE, BEHR, and BrainBee logos are now on every label.

- **Reference numbers**

All MAHLE Aftermarket PAG oils have new reference numbers. You can find an overview of the previous and current part numbers in the following table.

New reference numbers for PAG oils from MAHLE Aftermarket

Oil type	Previous reference no.	New reference no.
PAG ISO 46	ACPL 1 000P	ACPL 19 000P
PAG ISO 100	ACPL 3 000P	ACPL 20 000P
PAG ISO 150	ACPL 2 000P	ACPL 21 000P
PAG ISO 46 YF	ACPL 7 000P	ACPL 22 000P
PAG ISO 100 YF	ACPL 8 000P	ACPL 23 000P

You can find more information about our air conditioning compressor oils in our product range brochure.
